# COMXCHANGE™

PBX · CALL ACCOUNTING · VOICEMAIL

COMXCHANGE SERVICES

Something new in ComXchange 14 is the Services Module in the Web GUI. We are very excited for this addition as it provides an interface to start and stop the services that the ComXchange Phones System relies on in one convenient place. To see the Services Module, navigate to the Admin > System Settings – Click on the Flyout Menu – then click on the Services Module.
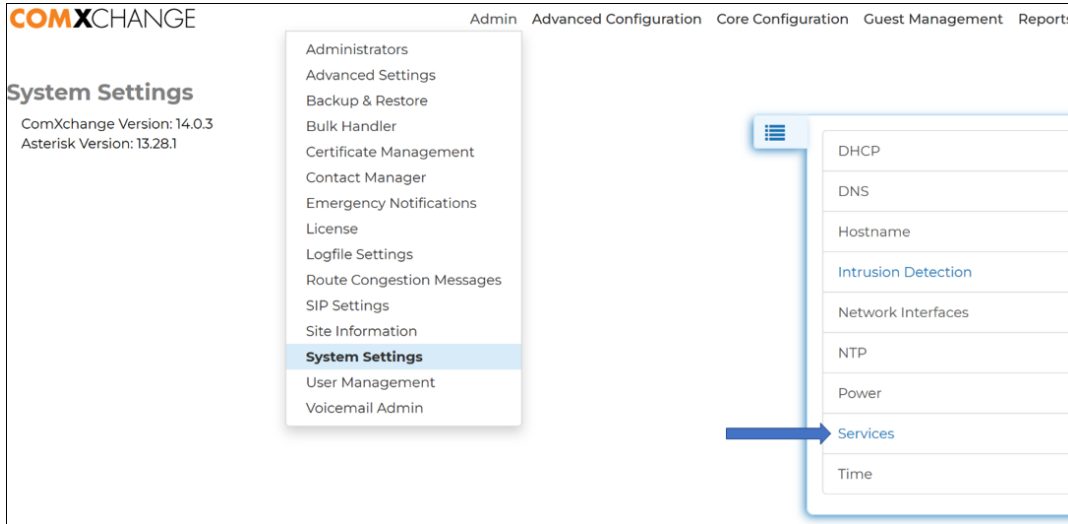

In the Services Module you can stop, start, restart and even disable/enable Core System services such as DHCP, NTP, the Firewall, OpenVPN, Intrusion Prevention, and the License Update Service. However, you also have access to the Hospitality services such as Call Accounting, Emergency Notification, Guest Voicemail, PMS, and Wakeup Call Services.

Services

Service	Enabled	Running	Actions
Call Accounting Service	☑	☑	⊗ ✓ ▶ ■ ⟳
Call Accounting Web Server	☑	☑	⊗ ✓ ▶ ■ ⟳
CDR Monitor Service	☑	☑	⊗ ✓ ▶ ■ ⟳
