COMXCHANGE™

SETTING THE NEW STANDARD

IN THE HOSPITALITY INDUSTRY, CUSTOMER SERVICE IS HELD TO THE HIGHEST STANDARDS.

And while a phone system is no longer a revenue center, it is at the center of your operations. A phone system is the way that reservations get booked. It's also how guests contact the front desk, request a wakeup call, or order room service. And, it is needed for life-safety to call 911. In other words, the phone system enhances the guest experience and needs to be working all the time.

ComXchange is a cloud-based and on-premise voice communication platform that bundles phones, voicemail and call accounting together in a unified communications system. It is setting the new standard for the hospitality industry and integrates with all major hotel property management systems (PMS). ComXchange is feature rich yet cost effective. It's reliable and dependable, too.

As business evolves, more applications are being delivered through the cloud. ComXchange's cloud application offers all the features and functionality of a premise-based phone system, but the system is housed in the cloud. Instead of a large, upfront capital expenditure, the cloud offers small monthly payments which include software upgrades and support. The predictable monthly fee and low upfront capital expenditure makes this a budget friendly option.

BENEFITS

- **CLOUD-BASED OR ON-PREMISE PLATFORMS**

Cloud-based systems offer the freedom from hardware and come with a small monthly payment.

- **FEATURE-RICH SYSTEM TAILORED TO HOSPITALITY**

ComXchange was developed exclusively to meet the demanding needs of the hospitality industry. ComXchange integrates with all hotel PMS systems and has features like voicemail and call accounting built right in.

- **INCREDIBLE VALUE**

Often hotels are forced to make do with either low-cost systems that lack compatibility, or super expensive enterprise systems that just don't fit. ComXchange is a much better choice with simplified pricing and no hidden fees.

- **NATIONWIDE NETWORK OF RESELLERS**

ComXchange is exclusively sold through national and regional resellers. These highly trained professionals offer local support and industry knowledge.

- **OUTSTANDING CUSTOMER SUPPORT**

We value our customers and treat them that way. With our industry experience, we have pretty much seen it all, and work hard to treat our customers with personalized customer support.

- **LEGACY COMPATIBILITY**

ComXchange offers an open-standards hardware platform that allows you to reuse your existing guest phones saving you thousands of dollars on your upgrade.

- **CARRIER GRADE RELIABILITY**

Let's face it. You have enough headaches. The last thing you need is for your phone system to be down. Again. ComXchange has proven itself reliable. Day after day. Year after year. If you want a unified communications system that works reliably, look no further than ComXchange.
